Dear Homeowner,

Thank you for considering Crown Roofing for your roof renovation needs. We are a family owned and operated business with over forty years contracting experience, three generations strong. The first twenty years saw Crown Roofing in the tract housing industry while the past two decades have been focused on providing residential roof renovations. Over the years we are pleased to say that we have completed over three thousand five hundred (3500) renovations in this time while keeping a high regard for our homeowners satisfaction.

Crown Roofing boasts a highly skilled and trained work force that strives to exceed industry standards on each individual project. We are very proud of our low rate of employee turnover, believing that paying our workers well provides an opportunity for employees to apply their trade in a fashion that is best for the customer. Moreover, our crews are very personable and sensitive to our homeowners needs, working in a quick and efficient manner leading to a 3-5 day turnover for most residential roof renovations.

Crown Roofing installs only the highest quality materials available, and we only do business with manufacturing representatives who have a proven track record in honoring all service warranties. Additionally, Crown Roofing is proud to include enhanced warranties, when applicable, from specific manufacturers with each proposal, and we personally carry a (5) year warranty on all craftsmanship and water tightness.

Please feel free to contact us and schedule a no-cost appointment through the contact form on our website interface or by giving us a call. We will be more than happy to go over your specific roof renovation needs in complete detail.

*Best Regards,
The Crown Roofing Team*
